

# Technician Position Available

JHU Requisition  
number: 300528

Regot Lab, Molecular Biology and Genetics

Come work in the exciting field of single cell signaling dynamics !!!

Do you want to be involved in starting the foundations of a competitive lab environment? The Regot lab is just starting at the Molecular Biology and Genetics Department. We are currently seeking a strong applicant to work as a Technician. This is a unique career opportunity that will allow the candidate to learn how to set up a competitive lab environment as well as to develop his or her own research project in the exciting field of cell signaling. Successful candidates will receive top-level training for future career steps and will be expected to organize the lab efficiently while assisting in high impact research projects. Applicants should be highly motivated and very hard working.

Experience with basic cell culture techniques and DNA cloning are required. Familiarity with transgenic mice and primary cell isolation is strongly preferred. Experience with computation/bioinformatics is preferred but not absolutely required.

To apply, please submit your CV and a cover letter summarizing your qualifications to [sregot@jhmi.edu](mailto:sregot@jhmi.edu) (include the requisition number: 300528). Please check our website for more information:
